

RP-2820 PNEUMATIC NUT RIVETING MACHINE

Rivet power RP-2820 model is a nut riveting machine designed to reduce production, maintenance and repair costs. The most striking feature of the innovative designs is the unique design of the tool bodies and air cylinders. The vertical hexagonal shaped air cylinder design changes the traditional way of production. The unique cylinder closure method produces relatively light rivet guns. Designed to reduce costs and required inventory items for production, maintenance and repair.

FEATURES

- * Quick change red colour with sliding sleeve.
- * Top oil filling.
- * Accurate stroke adjustment scales.
- * Easy maintenance
- * 360 degree rotatable air adapter.
- * High Mg alloy hexigon design light and strong.

SPECIFICATIONS

Air Supply	5 - 7 bar
Traction Power	46,400N-64,960N
Stroke	1-9 mm adjustable
Net Weight	3.35 kg

Ø	ALUMINIUM	STEEL	STAINLESS STEEL
