

ROCOL RP-1 AIR RIVETING TOOL

Rivet power RP1 model is a riveting machine designed to reduce production, maintenance and repair costs. The most striking feature of the innovative designs is the unique design of the tool bodies and air cylinders. The vertical hexagonal shaped air cylinder design changes the traditional way of production. The unique cylinder closure method produces relatively lighter rivet guns.

FEATURES

- * Ergonomic design, more comfortable to use
- * Modular and innovative design.
- * Vertical hexagonal shaped air design.
- * Light weight. Only 1.30kg

SPECIFICATIONS

Air Supply	5 bar - 7 bar
Traction Power	7.430N - 10.400N
Stroke	18 mm
Net Weight	1.30 kg
