

HUCK BV4500

FEATURES

- * Single-charge rivet gun with electronic pulling force adjustment
- * High quality and durability (tested with 50,000 rivets)
- * High pulling force (adjustable) & long pulling stroke range for many different rivets
- * Used in the application of all Huck blind rivets and lockbolts (blind rivets up to 6.4 mm 1/4 BobTail / Magnagrip)
- * Fully compatible with Huck rivet nozzles and Makita 18V batteries

Known for reliability and robust performance, the specially designed tools provide consistent, repeatable and precise fixing installations. The adjustable force feature ensures consistent installations every time. This battery-powered system is particularly well suited for field installations or assembly lines where mobility and adaptability are paramount. The ability to operate without power cord restrictions makes it an ideal choice for industries requiring flexibility and consistency in fastening applications.

Capacity : 3/16" (4.8mm) - 1/4" (6.4mm)

Stroke Length : 30mm

Pulling Force : Adjustable up to 20kN

Weight : 2kg, with 5Ah battery

Battery : 18V / Li-ion / 5Ah

Charging Time : 45min (approx.)
