

## HUCK 507 HYDRAULIC RIVETER

The Model 507 is a heavy duty tool sized for the installation of 1" C50L HuckBolt fasteners. This rugged tool provides high speed assembly in a wide variety of production applications. The basic design of the Model 507 utilising a simple cylinder and piston assembly offers exceptional reliability. This tool also features a relief valve that relieves hydraulic pressure at both ends of the stroke and a pintail ejector built into the nose assembly.

**Weight : 19.5 kg**

**Tensile Pressure: 393 bar**

**Maximum Operating Temperature : (51,7° C)**

**Power Source : Powerig Hydraulic Unit**

**Head Length : 166,69 mm**

**Stroke : 63.50 mm**

**C50L rivets are applicable.**
