

PROSET XT-1

The ProSet® XT1 will keep your production lines running at full speed. This compact, lightweight, and reliable tool is amongst the highest force-to-weight ratio blind riveting tool in the industry. The innovative, ergonomic design ensures maximum user comfort and efficiency.

Performance

- * High force-to-weight ratio
- * Quick-release nose and jaw housing for easy maintenance
- * Transparent, quick-release mandrel collector bottle reduces downtime
- * Integrated exhaust valves for fast set-up cycles

Ergonomic

- * Comfortable, low-activation trigger
- * Adjustable vacuum-exhaust direction

Economical & Safe

- * Air isolation switch during MCS removal.
- * On/Off, left or right pivoting air connection minimises air consumption and noise and saves energy.
- * Rubber base designed to prevent damage.
- * Piston bearing rings ensure maximum durability and tool life.
- * Mandrel Collection System instantly collects used mandrels and quick disconnect system makes disposal time-saving.
- * No tools required for routine maintenance and cleaning.

SPECIFICATIONS	
Weight, including nose equipment	1.17 kg
Weight, excluding nose equipment	1.07 kg
Tensile force at 5.5 Bar	6.5 kN
Force to weight ratio	5.55 kN/kg
Stroke	18 mm
Cycle time	0.4 sn
Air supply pressure (dry, filtered)	5.0 - 7.0 bar
Free air volume at 5.5 bar	2.2 L
Noise level	77.1 dB(A)
Jaw quantity	3

No tools required for routine maintenance and cleaning

Both front and rear end components can be serviced in minutes without removing the tool from the production line. The patented quick disconnect cutting nose housing and jaw allow the front end to be quickly cleaned and serviced without the need for any tools.
